District 101

Batavia Public Schools

bps101.net

Always Learning. Always Growing.

Dear Parents, Students and Staff:

Batavia School District #101 has been inspected for asbestos containing materials in our schools. As part of our annual asbestos management plan update, we are providing this notification. It is our intent to provide all the information for dealing with asbestos to parents, students and staff as recommended by the Environmental protection Agency and the Illinois Department of Public Health.

The school district's architect certifies that no asbestos containing materials were specified in the construction documents for Rotolo Middle School, Hoover-Wood Elementary School or Grace McWayne Elementary School. All the inspections done at the other schools indicate that none of our buildings pose a health risk to students, staff or the public.

The inspection reports and management plans are available at the Administration office, or the respective building principal's office for your review.

For further information regarding the asbestos in our schools please contact the Batavia School District office at 335 W. Wilson Street, Batavia, IL 60510.

Sincerely,

Patrick Browne
Director of Buildings and Grounds
Batavia Public Schools
